Dear Customer,

Subject: European Regulation on Chemicals (REACH)

As a manufacturer of switches, Santon Holland BV wants to supply products that do not only deliver a top performance, but are also sound products for the environment throughout their entire life cycle. We carry out our production processes in an environment-friendly way and therefore make a contribution to a sustainable society.

With this aim in mind Santon closely observes the current environmental laws.
Because it also concerns our world and our future.

So we hereby inform you that according to REACH legislation none of the Santon companies has an obligation to register substances, on their own or in preparations. Indeed, Santon does not produce any of the substances referred to under REACH, nor does Santon import these substances in quantities over 1 tonne per year.

We also want to let you know that we do not add to our products any of the substances of the Substances of Very High Concern (SVHC) as currently identified and published by the REACH authorities.

As a downstream user Santon shall follow the instructions in the safety data sheets (and implement the exposure scenarios which can be attached hereto) received from its suppliers and will communicate closely with customers and suppliers about hazardous substances (including SVHC) and possible risks inherent to the use of the products that contain such substances.

It is our duty to make sure that our suppliers are aware of REACH and comply with their requirements. In this respect we are asking our suppliers to deliver us a statement confirming that they follow the REACH obligations and ask them for confirmation that registration of their substances, if needed, has taken place or is going to take place.

Should you have any further questions concerning the above, do not hesitate to contact us.

With kind regards,
Santon International bv

Mr. M.W. Reddering,
General Director
